

**REMARKS**

Receipt of the Advisory Action of July 11, 2006 is respectfully acknowledged.

Several points are raised that need to be addressed.

(1)

“ . . . there is no ‘manifold’, and thus the meters in the claim may be commented in series;”

The examiner is correct in that claim 9 as amended deleted the recitation of “a piping manifold.” This deletion, however, does not mean that the meters are necessarily connected in series. They may or may not. They are, however, connected to the source.

(2)

“ . . . the deletion of ‘and/or’ suggests that the claim now includes 2 meters.”

Claim 9 includes “at least one flow meter” and “at least one flow meter calibration cart.” These are different and should not create any confusion.

Claim 10 has been amended to insert the “,” noted by the Examiner.

(3)

Regarding the disposal of water, the water is guided to a drain pipe which amounts to disposal.

Date: July 18, 2006

Respectfully submitted,
